Kigali, Rwanda

Introduction

Innovative full-stack developer and aspiring tech entrepreneur, deeply passionate about transformative education. Driven by curiosity and a commitment to positive change, I leverage cutting-edge technologies to create impactful solutions. My collaborative approach and diverse skill set push boundaries in AI and robotics, fostering inclusive environments that nurture growth and innovation. Inspired by the philosophy of working for success rather than wishing for it, I continuously strive to make a meaningful difference in the world.

KEY COMPETENCIES/SKILLS

Javascript (NodeJS, ReactJS, Nextjs, TypeScript), Maps Styling (CSS, TAILWIND, SCSS, BOOTSTRAP), Database (Prisma, MongoDB, MySQL, PostgreSQL, Firebase) HTML5, PHP (Laravel)
Python, WebRTC

PROFESSIONAL EXPERIENCE

SOLEKTRA Rwanda - Fullstack Developer

03/2025 - Current

- Designed and developed a user-friendly system to assist agents in banking transactions.
- Led the frontend development, delivering a fully functional interface within a month.
- Prioritized human-centered design principles to enhance usability and accessibility.

Minecofin - Intern (Rwanda)

06/2024 - 09/2024

- Contributed to the development of an automated restaurant system designed to enhance efficiency and transparency.
- Focused on frontend development and backend integration to ensure seamless user interactions.
- Implemented QR code-based attendance tracking to optimize resource management.

T-Globals - Frontend developer (US, Remote)

03/2024 - 05/2024

- Designed and developed an interactive website to highlight TGlobals' LED advertising solutions and project portfolio.
- Created a visually appealing and user-friendly layout to attract potential advertisers and showcase TGlobals' impact.
- Enhanced brand visibility through responsive design, ensuring accessibility across devices and platforms.

CAREER OBJECTIVES**SHORT TERM GOALS**

As of right now, I am focused on pursuing a college degree that offers robust programs in artificial intelligence, technology, and business. My immediate goal is to acquire essential skills in AI, machine learning, data analysis, and business strategy through both academic coursework and hands-on projects. I aim to build a strong network of mentors and professionals in the fields of AI, agriculture, and business. Additionally, I plan to engage in practical projects that apply AI to agricultural challenges, gaining valuable experience and demonstrating the potential of innovative solutions.

FUTURE PROJECTIONS

My long term goals are centered around becoming a leader and entrepreneur in the field of artificial intelligence, with a specific focus on transforming agriculture in Rwanda and Africa. I aspire to create and lead projects that enhance agricultural productivity and food security, thereby contributing to the reduction of world hunger. I envision launching a startup dedicated to AI-driven agricultural solutions, collaborating with local communities, governments, and NGOs to implement scalable and sustainable technologies. Ultimately, I aim to be a thought leader in AI for agriculture, driving positive change and influencing policy on a global scale.

SKILLS

Javascript (Typescript, React.js, Next.js, Node.js), Styling (CSS, SCSS, Tailwind, Bootstrap)

HTML, PHP, Prisma, C++, Java Databases (MongoDB, MySQL, PostgreSQL), Real time data integration, Chat applications

EDUCATION & CERTIFICATIONS

Rwanda Coding Academy (Undergraduate Diploma)
Majors: Software Engineering

HOBBIES

Basketball, Music, Swimming
